Watersheds, wildlife, and wonder!

Developed with a focus on stewardship by renowned marine-life artist Wyland, Water's Extreme Journey joins the worlds of art and science to demonstrate the importance of clean water and how it connects us all.

"... the exhibit couldn't have come at a better time as our region has experienced some very dry weather. My only wish is that it could stay with us longer!!!"
- **Hands On! Regional Museum, Tennessee**

"People who visited the exhibit had no idea that what we do really does impact water, but this exhibit changed that. Even a year later we are still getting comments."
- **Western Heritage Museum Complex, New Mexico**
